

SAI PRUDHVI BODEMPUDI

Hyderabad, Telangana

LinkedIn +91 7893277617 saiprudhvibodempudi11@gmail.com

Professional Summary

Engineering graduate skilled in Python and SQL with hands-on experience in robotics software and Artificial Intelligence systems. Strong foundation in Data Structures and Object-Oriented Programming, seeking an entry-level Software Developer role to build scalable solutions.

Experience

Vir Innovations (On-Site) — Software Engineering Trainee Mar 2026 – Present *Promoted from Software Engineering Intern (Sep 2025 – Feb 2026)*

- Optimized Python-based robotics modules, improving system efficiency and responsiveness.
- Developed control logic for reliable and accurate robot navigation.
- Integrated software and hardware components to enhance system performance and reliability.

Projects

Lip-Sync Express – Real-Time Facial Animation from Speech Jan 2026 – Feb 2026

- Created a deep learning-based web application generating real-time facial animations from speech audio.
- Applied Bidirectional Long Short-Term Memory (Bi-LSTM) networks for realistic facial movement prediction.

USB Device Forensic Framework on Windows Jan 2026 – Feb 2026

- Built a Python-based forensic framework to analyze USB activity and detect potential data leakage.
- Correlated registry entries, event logs, and file artifacts to construct an investigative timeline.

Martin – Robotic Navigation System Jan 2026 – Present

- Developing an autonomous navigation system using offline map data with laser-based obstacle detection and SLAM.
- Integrated computer vision and embedded control modules for accurate path planning.

Technical Skills

Programming Languages: Python, SQL

Core Subjects: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks

Technologies: OpenCV, Deep Learning, SLAM (Simultaneous Localization and Mapping)

Tools: Git, GitHub, Linux, Visual Studio Code

Education

Kalasalingam University — Tamil Nadu June 2021 – May 2025

Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence and Machine Learning)

CGPA: 8.01/10

Certifications

- CodeChef – Python Course (Completed all lessons and projects)
- Oracle – Artificial Intelligence Foundations Associate
- Microsoft – Azure AI Fundamentals

Achievements

- **Alzheimer's Disease Prediction using RFE and ANN** — Published research paper in IEEE.
- **Infosys Global Hackathon – Second Place (2025)** — Built an interactive voice response (IVR) based agricultural assistance platform.
